Email: asmita3jaiswal@gmail.com | asmitabtmcs10242909@nfsu.ac.in

Profile

Second-year B.Tech.-M.Tech. Computer Science (Cyber Security) student at NFSU Dharwad with a CGPA of 9.23/10. Hands-on experience in vulnerability assessment, penetration testing, digital forensics, and machine learning applications. Proficient in Python and industry-standard security tools including Nmap, Burp Suite, Wireshark, and Kali Linux. A disciplined and fast learner, eager to contribute to real-world security challenges through the Infosys InStep Internship Program.

Education

National Forensic Sciences University (NFSU), Dharwad, Karnataka-

B.Tech.- M.Tech. Computer Science and Engineering (Cyber Security) (Five Year Integrated)

July 2024-present

CGPA (First Year): 9.23 / 10.00

Jawahar Navodaya Vidyalaya (JNV), Ambedkar Nagar, Uttar Pradesh-

CBSE Senior Secondary Education (CLASS XII)

March 2024

Technical Skills

- Programming: Python, C, C++, SQL, HTML, CSS
 - Cybersecurity Tools: Nmap, Wireshark, Burp Suite, Hydra, Kali Linux
 - Concepts: Vulnerability Assessment, Ethical Hacking, Digital Forensics, Malware Analysis
 - Other: Git, VS Code, Poster Designing, Video Editing
-

Awards & Academic Accolades

- Second Prize – Regional Science Congress, Science Exhibition, Banaras Hindu University (BHU)
 - CBSE Class XII: 95% (475/500)
 - CBSE Class X: 94.4% (472/500)
 - JEE Main 2024 Qualified (90+ Percentile)
-

Co-curricular & Extracurricular Activities

- Participated in **Smart India Hackathon (SIH) 2025** – Worked on a Language-Agnostic Chatbot, contributing to problem analysis, solution design, and implementation
 - Participated in Technical Quiz – **TCS Tech Bites**
 - Conducted cybersecurity awareness **sessions at NFSU Dharwad for NWKRTC officers**
 - Delivered a **presentation** on Encryption and Decryption during **NFSU Dharwad Open Day**
-

Experience & Projects

- **AI & ML Intern – Edunet Foundation (AICTE)** |6 weeks|(June 2025 – July 2025)
Developed a Python-based employee salary prediction model using machine learning
- **Cybersecurity Lab Practice**
 - Conducted network scanning and service enumeration using **Nmap**
 - Performed packet capture and traffic analysis using **Wireshark**
 - Executed web vulnerability assessment using **Burp Suite**
 - Practiced password cracking and brute-force attacks using **Hydra**
 - Simulated **Man-in-the-Middle (MITM)** attacks in controlled lab environments
